

**As representative as functional**

German engineering skills are still in demand worldwide. One example is the meeting room in the Senegalese **State Department** in Dakar. It was equipped with retractable monitors of the **CONVERS ONE** series. This is where the international guests and ambassadors are received.

A **conference room** that also stands up to international comparison was implemented. The result: the Ministry in Senegal is **completely satisfied**.

Exemplary. Especially since the rapid implementation of the time-critical project was a special challenge.

The meeting room of the Senegalese Foreign Ministry is a 140 square metre, plain and simple room. The central conference and interpreting table with 30 seats was equipped with 17 retractable monitors from the **CONVERS ONE** series. The monitors are centrally controlled and administered via a network using TCP/IP.

The **CONVERS ONE 185** is designed and made for meeting and conference rooms, which should be both representative and multifunctional. With a screen diagonal of 18.5", **CONVERS ONE 185** is as convenient to operate as it is to install in a space-saving manner.

If they are not required, the monitors can be simply and invisibly **retracted in the table**. When extended, the aluminum-milled and powder-coated **CONVERS ONE** unfolds its full aesthetic appeal and elegance.

Installation	2020
Monitors	CONVERS ONE 185
Integration	TITAN International, Dakar
